WEATHER OF CONCERN

Weather of Concern

- High pressure is expected to develop in the Bay Area Saturday night through Sunday morning. Gusty northerly winds are expected, resulting in warming and drying. Dry and gusty winds will produce critical fire weather conditions.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

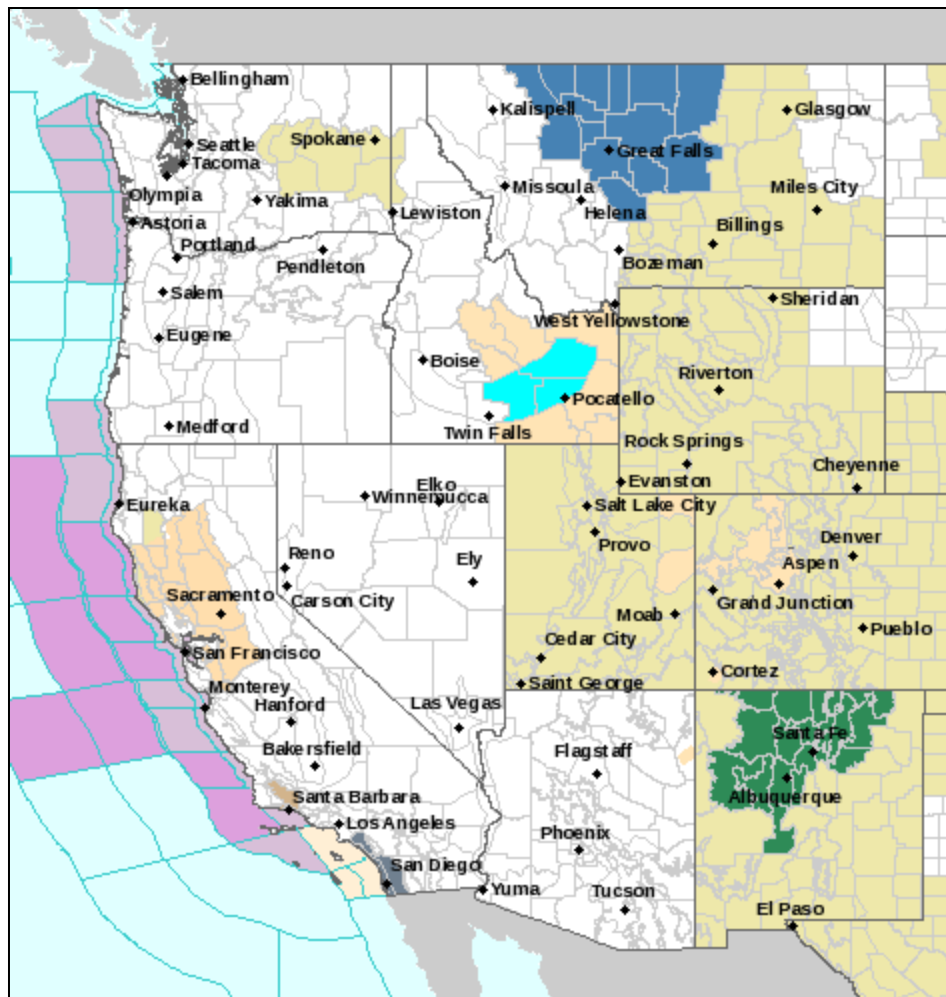

NORTHERN CALIFORNIA

A low pressure trough will develop over the northern Great Basin during the weekend. This will set up a rather strong northerly flow over Northern California on the western side of the trough with something of another, mostly dry front moving over the region next Tuesday/Wednesday. Gusty NW to N winds will develop this weekend, especially Sunday and last through early next week. Wind gust speeds Sunday into Tuesday are expected to generally be 20-30 mph, but about 25-35 mph in the windier locations. Temperatures will be nearer normal values this weekend through Monday (low to mid 80s warmest inland valleys) then cooler next week (mid 70s warmest inland valleys). Relative humidity values will vary, but increase somewhat for a few areas through the weekend. Values will vary next week and depend heavily upon the wind direction and speed in any area. The windier north wind areas are likely to be quite dry with rather poor overnight recovery developing.

SOUTHERN CALIFORNIA

A longwave trough will move into the Pacific Northwest and the Great Basin during the next few days. This will result in cooler, onshore flow with breezy conditions during the afternoon hours. By Sunday, highs will be in the upper 70s to lower 80s in the valleys with night through morning stratus returning to the coastal areas. Local northwest winds of 15-25 mph will be possible across portions of the central coast and in the Kern County Mountains this afternoon and evening. Over the weekend, winds in these areas, as well as the Banning Pass and the eastern Cleveland N.F., will increase to 20-30 mph with gusts to 40 mph. Saturday night and Sunday night, local north winds of 15-25 mph will occur along the I-5 Corridor. A low pressure area may drop into Central California early next week, resulting in even cooler weather. By Monday and Tuesday, highs in the San Joaquin Valley may only reach the lower to mid 70s. Winds should be light early next week. The trough will depart the region next Wednesday, leading to sunny, warmer weather with less marine layer coverage. Minimum relative humidity will drop into the 10-15% range Friday, but should stay above 20% over most areas Saturday and beyond.
